

The background is a night-time photograph of a modern city skyline. In the foreground, a glass-enclosed walkway or bridge extends into the distance, with two small figures of people walking away. The sky is dark, and the city lights create a bokeh effect. A large, semi-transparent white circle is centered over the image, partially obscuring the text and the background. The Nokia logo is in the top left corner.

# AI is the primary engine of innovation over the next decade, potentialized by the integration of emerging technologies

## Artificial Intelligence

Augmenting human capabilities

## Quantum Compute

Incomparable computing capacity

## Devices

Smartphones evolving to natural language and multimodality to be more ‘human’

## Security

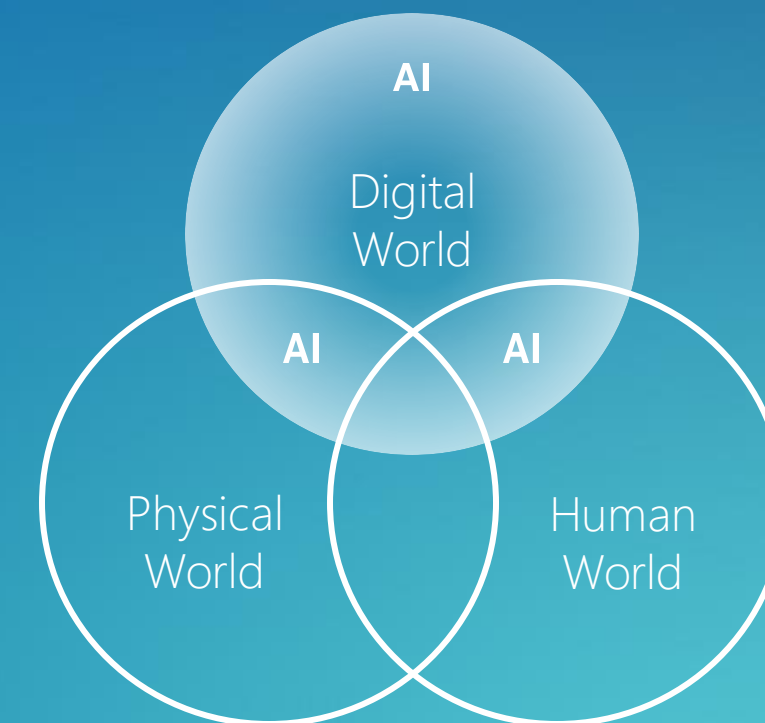

Need for cyber security and privacy increases exponentially

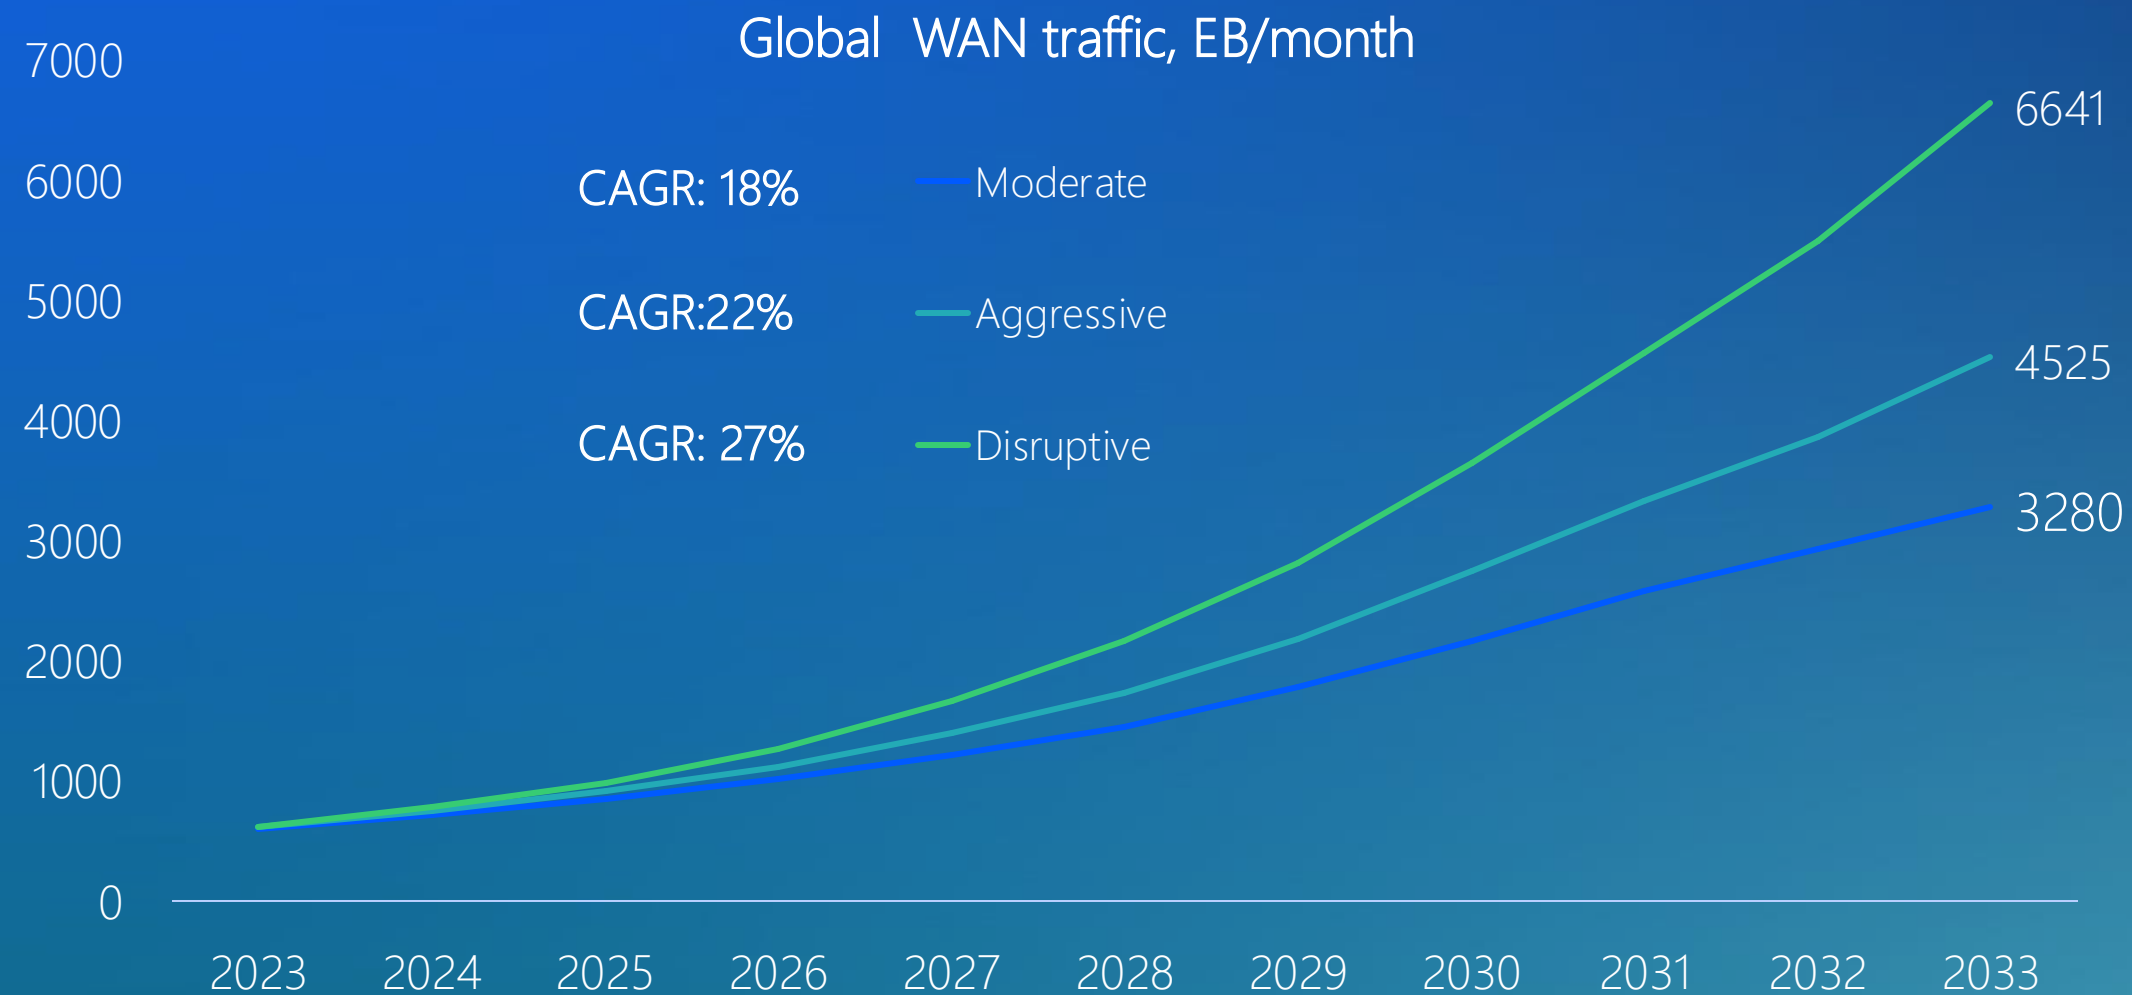

## Merge of worlds

Nokia Bell Labs envision that by By 2030+, technology expanding human possibilities:

- Connection of human, physical, and digital worlds
- Digital convergence boosts digital world’s potential
- Transformation across society and business

# The combination of new services, device expansion and surge in AI usage are fueling unprecedented data traffic growth

Global traffic  
will grow at a CAGR of  
18% to 27%

Global consumer traffic  
CAGR of 18%-25%

Enterprise WAN traffic  
CAGR of 23%-36%

## Aggressive Model

Increase in Enterprise , AI and consumer cloud traffic .

## Disruptive Model

Further Increase on Enterprise Industrial and Consumer XR traffic

# We need to keep up, for the world to go forward

## Our solutions are designed and ready to cope with the new demands

### AI-driven autonomy

#### Built-in AI

- ▶ Proactive insight
- ▶ Intent-based control
- ▶ Path to L4+ autonomy

### Automation at scale

#### A unified model

- ▶ Driving full lifecycle automation
- ▶ Simplifying operations in all domains (RAN, IP, Fixed, Optics, Core, Transport)

### Secure by design

#### Telecom-specialized defenses and real-time assurance

- ▶ Resilience
- ▶ Compliance
- ▶ Future ready

### Data Centers

#### EB (Exabyte) Era

- ▶ Datacenter for IA training
- ▶ Datacenter for inference
- ▶ Edge Computing

# We need to keep up, for the world to go forward

## Our solutions are designed and ready to cope with the new demands

Networks as platforms for monetization to enhance and drive our customer's competitive differentiation

- Network as a Code-Open APIs
- Converge Charging
- Network slicing
- Private Networks
- Autonomous Network Fabric

### Built-in AI

- ▶ Proactive insight
- ▶ Intent-based control
- ▶ Path to L4+ autonomy

ESG

Continuously improving product energy efficiency, driving circularity to reduce waste, sustainable operations and supply chain, providing critical networks for life

# An unrivalled track record of driving innovation that changes the way we live, work and communicate

Transistors

# Nokia Bell Labs

The past guiding the future

# TIME and Statista's World's Most Sustainable Companies List

We're truly honored to be named one of the World's Most Sustainable Companies in 2025, ranking #37.

This recognition is a testament to our strategic commitment to sustainability, fully aligned with our corporate strategy to develop ESG into a competitive advantage.

The logo for TIME magazine, featuring the word "TIME" in a bold, red, serif font, centered within a white rectangular box.

# We create technology that helps the world act together

At Nokia, our mission goes beyond technology: we create value for customers, partners, and end users.

Scalable, secure, and sustainable networks. Innovative business solutions and new ways to monetize networks. Smarter digital experiences.

Together, we are shaping the future of connectivity and telecommunications in Brazil.

The background features a dynamic, abstract composition of numerous thin, flowing lines. These lines are primarily red and orange, with some blue lines interspersed, creating a sense of movement and depth. The lines swirl and loop around the central text, adding a three-dimensional feel to the design.
